

Bio of Kai Wang:

Kai Wang earned both BS and MS degrees in Electronic Engineering at Tsinghua University in 2005 and 2007. He then came to United States and started his graduate study in School of Engineering and Applied Sciences in Harvard University, where he gradually found his research interests on the interface between optical sciences and biological sciences. After obtaining PhD degree in 2011, he joined Dr. Eric Betzig's Lab in Howard Hughes Medical Institute and worked on developing novel optical imaging methods for biological studies. In 2015, he was recruited as group leader in Institute of Neuroscience and started the Laboratory of Optical Neuroimaging.
